Using Data To Visualize The World

By STEVE KRASKE & LUKE X. MARTIN • AUG 16

Composer, artist, software designer ... whatever you want to call him, R. Luke DuBois is a thinker. He's done a portrait of every president using only words from their State of the Union addresses, and employed a real gun and blank bullets to visualize every shooting in New Orleans, all with the aim of helping people better understand the world around them.

R. Luke DuBois is a presenter at Kansas City's independently organized TED event, TEDxKC, which starts at 6 p.m. on Friday, August 19, at the Kauffman Center for the Performing Arts. The live and simulcast venues are sold out, but watch party tickets are available. For more information go to TEDx-KC.org.
